June, 2009

Instruction on how to upgrade to A2B Controller Software 2.8.1 from earlier CSW versions.

1. Before installing 2.8.1 you must Uninstall (remove) the A2B Controller software version you are using.

2. Download the Controller Software 2.8.1 from www.a2b.se/support.php

3. Install the Controller Software 2.8.1 on the PC.
   NOTE! You must restart the PC after installing 2.8.1 before connecting to an EMU-100

Remark: The CSW 2.8.1 is compatible with all E serie products except older EMU-100 produced before 1th of februari 2009. If you need to connect to an older EMU-100 you must have another PC with older controller software (version 2.5.1 to version 2.7.1) or uninstall the 2.8.1 CSW and reinstall an older version on the same PC.

If you experience any problems with the installation or the new controller software, please contact our customer support:
