- ✓ LOW ENERGY CONSUMPTION

AUTOMATIC SWITCH-OVER For MyM Pro MICRON

Main Function

- Automatic switch-over from IP to installed frontend case of IP disturbance and/or breakdown.
- Switch-back functionality: none

Description

- Detection of loss of TS packets in IP-in interface during a certain time period (watchdog). The watchdog triggers the switch-over function.
- LUA command for enable/disable watchdog. The watchdog change startup mode (S/T/C/IP) to "Alternative switch-over source" and do a reboot.

Settings

- Timeout default value = 3600 seconds
- Alternative switch-over source (T, S or C), default value = T. Use previous selected services setup for that source
- No automatic service switch.
