Instruction on how to upgrade MyM Pro- 3T/6T and MyM Pro-3S/6S to firmware version 2.1SR4

> *It is extremely important that you follow the instruction below, otherwise the upgrade will fail!*
> *Download the zip file, unzip and save files to a directory at your PC.*

NOTE! **If upgrade is done with previous FW version before 2.1, follow this Instruction.** *Please stop all analogue decoding and remove CA module before starting the upgrade procedure. Make sure that all programs are unselected in Service management i.e. click boxes are grey marked.*

		🔒		Cartoon Network	Turner Networks	Ant 2	3330

A) Connect your PC to the MyM Pro (direct or through switch) unit that you want to upgrade. *NOTE! Use Internet Explorer because that web browser is approved.*

B) Unselect all services (as picture ahead) and remove CA modules.

C) Select the menu "System options" and browse for the file FW 2.1SR4 at your PC and click on "Upload".

D) When Upload complete! is shown for the new uploaded files, click on "Reboot unit" button and wait 2 minutes.

E) Click on "Overview menu" and you shall now get a view like below.

If you experience any problems with the installation or the new software, please contact our customer support or call +46 (0)141 229100:
