# VidiOS™ Management & Monitoring Tools
# Carrier-Grade Control & Visibility in Every Inca Product

✓ Award-winning management and troubleshooting tools

✓ Inbound and outbound video thumbnails

✓ Powerful grooming and monitoring tools

✓ Extensive statistical analysis and event logging

✓ Click-of-a-button stream sample downloads

✓ User-friendly web-based interface with hover-help fields

## The Core of Intelligent Video Delivery

Meet VidiOS™, an advanced processing and monitoring engine that provides unique visibility into every step of the video processing chain.

Enables rapid configuration and deployment for all Inca products

Experience deep visibility and efficient troubleshooting

Experience effective diagnostic tools with video thumbnails, stream sample downloads, detailed stream statistics including PID and payload details, warnings and errors

## Applications

✓ Ensure compatibility with existing systems with powerful MPEG grooming tools, like program and PID filtering and remapping.

✓ Pair any Inca product with the All Seeing Eye for a centralized headend monitoring system with an overview mosaic powered by VidiOS™.

✓ Optimize output streams with options to reduce jitter, strip null padding and convert between VBR and CBR.

✓ Access Inca's easy-to-use user interface using any standard web browser.

✓ Monitor streams generated by third party equipment by configuring them as sources in any Inca product.
